

infrastructure

ServerConsumer

```
classDiagram
    class ServerConsumer
    class EnvironmentManager
    class Server
    class DockerHelper
    ServerConsumer ..> EnvironmentManager
    EnvironmentManager ..> Server
    EnvironmentManager ..> DockerHelper
```

The diagram illustrates the infrastructure layer. At the top is the **ServerConsumer** class. Below it is the **EnvironmentManager** class. To the left of **EnvironmentManager** is the **Server** class, and to the right is the **DockerHelper** class. A dashed arrow points from **ServerConsumer** down to **EnvironmentManager**. Another dashed arrow points from **EnvironmentManager** left to **Server**. A third dashed arrow points from **EnvironmentManager** right to **DockerHelper**. All classes are represented as rectangles with three horizontal compartments: the top for the class name, the middle for attributes, and the bottom for methods.
